

Sementi da Agricoltura
Biologica e Biodinamica
Organic and Biodynamic Seeds

coltiviamo la Biodiversità
we sow Biodiversity

www.arcoiris.it

Il nostro impegno: Biologico, Biodinamico, Biodiversità e Italiano

Il nostro obiettivo principale è selezionare, e moltiplicare, sementi (non ibride e rigorosamente non OGM) specifiche per la produzione biologica e biodinamica.

Inoltre siamo fortemente impegnati nel recupero di antiche varietà italiane per difendere il nostro immenso patrimonio di biodiversità e per consentire ai produttori, e agli appassionati, di coltivarla.

È un punto cardine della nostra attività quotidiana che ci vede in prima linea nel tutelare il pregevole lavoro svolto dai contadini che ci hanno donato varietà, e sapori, che vanno protette, riportate nei campi e sulle nostre tavole, perché il seme di qualità è all'apice della catena alimentare.

E per produrre un seme di qualità facciamo ricerca in collaborazione con gli Istituti di ricerca e le Università.

Our commitment: produce an Organic, Biodynamic and Italian product and protect Biodiversity

Arcoiris only produces exclusively organic and biodynamic seeds with Italian producers in a national and ethic chain.

Our main commitment is to select and multiply seeds (non-hybrid and strictly non-GMO) specifically for the production organic and biodynamic.

We are strongly committed to the recovery of ancient Italian varieties to defend our immense wealth of biodiversity and to enable producers and lovers of the earth to cultivate.

It is a cornerstone of our daily activities to protect the valuable work done by farmers, who have donated us varieties and flavors which are growing in our fields and are served in our meals. The quality seed is to 'apex of the food chain.

To produce quality seeds we do research in cooperation with research Institutes and Universities.

Catalogo Sementi

Sementi in busta termosaldada dimensioni cm 11,5x16
con foro europa.

Heat-sealed seed pocket - cm 11.5x16 with eurohole

Aromatiche e Fiori

Catalogo Sementi
